Title: Simple Timesheet

Description:

A timesheet website for employees of a company to clock in and out. Each employee can login and view or update their timesheet. A manager can alter the times if a mistake is made. Total time for a pay period is automatically calculated. This timesheet will only be for one company.

Actors: Employees, Manager(s)

Functionality:

1. Employees can be created by the manager
2. Employees, Manager can edit their password
3. Employees, Manager can log in
4. Employees, Manager can check in
5. Employees, Manager can check out
6. Employees can view their own timesheet
7. Managers can view all timesheets
8. Managers can edit all timesheets
9. Managers have a dashboard that contains the stats for each employee
10. Time clocked in per Employee, Manager is summed per pay period
11. All data is saved to a database

Stretch Functionality:

1. Request manager to edit timesheet
2. Generate a downloadable Excel/csv file of the timesheet
